

ProAdventure and the Environment

Here at ProAdventure we know that the world is a rapidly changing place, and we have ongoing concerns about the way we, as a business, affect the environment - both locally and globally. We are taking part in the Welsh Green Dragon Award Scheme to help us monitor the effects and look at ways of minimising damage, and to help you recognise that we care about the effect we have on the environment.

We have put together a few things for you to think about before your activities take place, and hope you will be as responsible as possible whilst looking after the planet, as we only have one to share.

Transport

Please consider travelling together, using the minimum number of vehicles possible to make your journey.

National Express from London to Wrexham runs past our door. Alternatively, Ruabon railway station is 5 miles away, and regular trains run to Chester and Crewe, with a good bus link from the station to Llangollen.

If you travel by public transport we can arrange for your transport to activity sites. Just let us know before you arrive!

We try to use a minimum of vehicles to drive to activity sites so please be prepared to share transport.

Waste

Bins are provided for you to recycle drinks cans and plastic bottles. Please don't drop litter on sessions. Bring it back to the centre so we can recycle or bin it properly.

Electricity and Water

Please switch off lights and conserve water as much as possible. We are on a green electricity tariff but that doesn't mean we can't - or shouldn't - take some pressure off the system.

On Sessions

Obviously all of our activities take place in the natural environment. Please keep to footpaths to minimise erosion of surrounding land. Please protect water courses by keeping to paths to minimise bank erosion and not polluting water with any kind of waste. If you listen to your instructors and keep noise levels down, you may see some interesting local wildlife!

Remember

If you aren't part of the solution, you're part of the problem!
